Detailed Description

Claims

English Abstract

...present invention, the integrated auction includes a live, in-person auction component (620) and an **online bidding** environment component. Bidding information associated with an item in the **online bidding** environment is updated to reflect a current bid associated with the item in the live...

...person auction. During the live, in-person auction, a bid may be accepted from an **online bidder** in the online environment that reflects a **maximum price** the **online bidder** is willing to pay for the item. Subsequently, the system bids on behalf of the **online bidder**

against one or more **live bidders** that are participating in the live, in-person auction based upon the **maximum price** (640).

Detailed Description

... the present invention, the integrated auction includes a live, in-person auction component and an **online bidding** environment component. Bidding information associated with an item in the **online bidding** environment is updated to reflect a current bid associated with the item in the live...

...person auction. During the live, in-person auction, a bid may be accepted from an **online bidder** in the online environment that reflects a **maximum price** the **online bidder** is willing to pay for the item. Subsequently, the system bids on behalf of the **online bidder** against one or more **live bidders** that are participating in the live, in person auction based upon the **maximum price**.

Other features of the present invention will be apparent from the accompanying drawings and from...starting bid for a traditional, live auction may be established based upon bids received from **online bidders**. Subsequently, in a second stage of the integrated auction, e.g., the "live auction stage..."

...as Guernsey's, using the highest bid from the pre-auction bidding stage. During the **live** auction stage, **bidding** information is updated on the online auction site and **online bidders** may submit additional maximum proxy amounts. Finally, in an optional third stage of the integrated auction, e.g., the "proxy showdown stage," if an **online bidder's maximum proxy price** is greater than the highest bid from the live auction stage, then the integrated auction returns to the live auction until the **proxy price** has been met. Advantageously, in this manner, the reach of traditional auctions may be expanded...

Claim

... associated with the item in a live, in-person auction; accepting a bid from an **online bidder** in the online environment reflecting the **online bidder's maximum proxy price**; and bidding on behalf of the **online bidder** against one or more **live bidders** that are participating in the live, in-person auction based upon the **maximum proxy price**.

2. The method of claim 1, wherein said bidding on behalf of the online bidder...

...with the item in the live portion of the auction, accepting a bid from an **online bidder** in the online environment reflecting the **online bidder's maximum proxy price**, and bidding against one or more **live bidders** that are present at the live auction portion of the auction until the **maximum proxy price** has been met.

5. A computer system comprising:

a storage device having stored therein a...

...in the online environment for a predetermined amount of time; feedback is provided to the **online bidders** by updating bidding information associated with the item in the online environment to reflect a...

...proxy bidding is accomplished by accepting a bid from one or more of the **online bidders** reflecting the **online bidders' maximum proxy price** and bidding on behalf of the one or more **online bidders** against one or more **live bidders** participating in the live portion of the auction until each of the one or more **online bidders' maximum**

proxy price has been met.

6. A machine-readable medium having stored thereon data representing sequences of...

...with the item in the live portion of the auction, accepting a bid from an **online bidder** in the online environment reflecting the **online bidder's maximum proxy price**, and bidding against one or more **live bidders** that are present at the live auction portion of the auction until the **maximum proxy price** has been met.

Integrated auction processing for remote online bidders and live participants, involves updating bidding information associated with bidding item, and accepting bid from online bidder that reflects maximum price

Abstract (Basic):

... Bidding information associated with the item in **online bidding** environment is updated to reflect current bid. During the auction, a **bid** that reflects **maximum price** is accepted from an **online bidder**. The system then bids on behalf of the **online bidder**, against the **live bidders**.
